

# ALISO VIEJO'S SMART INVESTMENTS

## **INCORPORATING THE GREEN CITY INITIATIVE INTO THE GENERAL PLAN**

The City is rewriting its General Plan and will incorporate various smart savings programs and investment opportunities. The goal is to create a greener Aliso Viejo through various opportunities including: water, energy, open space, transportation, etc.

## **LAUNCHING A COMMUNITY OUTREACH INITIATIVE**

Every month the City hosts a community outreach program designed to solicit information on the City's future plans. Residents are invited to attend and provide feedback on the programs and policies the City is considering.

## **ASSISTING WITH THE HIGH SCHOOL'S ENERGY CLUB**

The City has a great connection with the local high school, Aliso Niguel High School, where students participate in regular discussions about energy issues.

## **CREATING A "COMPLETE STREETS" DEMONSTRATION AREA**

Aliso Viejo Parkway is a demonstration area for the City's first complete street. Complete streets are designed to incorporate various modes of transportation from bikes to wheelchairs, and should be safe, comfortable, and attractive for all users.

## **DEVELOPING A LIVE-WORK PROJECT AT CITY WALK**

A development built by Shea incorporates the City's first live-work project at City Walk. These residences, in Shea's Vantis development, allow homeowners to live above their business/store front. The project was designed to save money while you make money, eliminate the need for a commute, and allow more time to be spent with your family.
