

## Green Vision Map Property Submission Form

In 2012, Friends of Harbors, Beaches, and Parks created a parcel-level version of the Green Vision Map and guidelines for submitting new properties for consideration on the Map. These Guidelines will help us more accurately determine what properties get included on the map and for what reasons (i.e., culturally significant sites, endangered or threatened species, rare habitat types, etc.).

If you would like to see a revision to the Green Vision Map, please complete this form and sent it to: [GreenVision@FHBP.org](mailto:GreenVision@FHBP.org).

### Property Designation Categories & Definitions

- **Active Conservation Projects**  
The property has a formal threat of development that includes a Notice of Preparation, Environmental Impact Report, formal meetings with agency staff or a plan check with the lead agency, and contributes to the greater vision of the regional open space plan.
- **Potential Conservation Lands**  
The property has no formal threat of development but still contributes to the greater vision of the regional conservation plan.
- **Public Conservation Lands**  
The natural lands are considered protected by a local, regional, state or federal agency.
- **Private Conservation Lands**  
The natural lands are considered protected because of its ownership by a conservation organization or the placement of a deed restriction or conservation easement.
- **Public Not Protected Lands**  
These natural lands are owned by a local jurisdiction but no protective mechanism ensures it is parkland.
- **Golf Courses and Cemeteries**  
The lands are formally used as golf courses or cemeteries but also allow for wildlife movement, nesting, and foraging.
- **HOA or Easement Lands**  
Properties owned by a homeowners' association (HOA) or contain a county conservation, scenic, or trail easement that abut existing public or private conservation lands
- **Landfills**  
County sites currently being used to deposit refuse.
- **Military Lands**  
Sites currently under use by the United States military.
- **Utility Lands**  
The natural lands are owned by a utility agency but function as contiguous habitat or wildlife linkages.
